

TAG

# A collectible marketplace

## Campaign playbook case study

### The client

A growing marketplace for collectible items

“ TAG completely reorganized our marketing reporting processes and developed detailed playbooks for end-to-end marketing campaigns. ”

Marketing Director

### CHALLENGE

As a growing marketplace, our client was ready to expand marketing efforts. However, due to rapid growth, they primarily **relied on reactive marketing** campaigns. To transition to a proactive approach, the client needed support in **establishing processes for planning, executing, and measuring campaigns.**

### SOLUTION

Our initial focus was to understand the current operations. We then collaborated with all stakeholders to **craft an end-to-end campaign process playbook.** This playbook included campaign setup procedures, data tracking and reporting, and deck templates. Implementing this new process enables the company to consistently and efficiently execute campaigns

Team collaboration

Playbook creation

### RESULTS

#### From reactive to proactive

This proactive approach will result in executing better campaigns, which in turn will lead to improved results.

#### Team alignment

Implementing clear end-to-end processes ensures that all team members understand their roles, responsibilities, and the overall workflow- leading to an effective campaigns execution

#### Implementing process in sister companies

Since the playbook is focused and easy-to-implement, our client was able to replicate it for their sister companies. This action saved our client from additional costly expenses.
